ELECTRONIC MASS MEASUREMENT ASSISTANT

TURN YOUR DIGITAL LAB SCALE INTO A STREAMLINED TESTING WORKHORSE.

Link-S with DB9 Cord

Null Modem & Gender Changer included (not pictured).

The Emma™ Electronic Mass Measurement Assistant transforms your lab workflow with seamless remote scale access and guided test procedures to quickly capture scale data and calculate test results. Emma Analysis software allows users to remotely tare scales, input weights, and follow guided test procedures. Emma simply plugs into the serial port of your lab scale, and the software walks you through common lab tests like Bulk Specific Gravity (Gmb), Max Specific Gravity (Gmm) and many others with simple step-by-step instructions.

Perfect for technicians of all experience levels, Emma offers both built-in guidance and expert mode, eliminating the need for extensive training of new technicians. All data is available in either PDF or CSV formats for further analysis.

Experienced users can switch to Expert Mode for fast data entry and instant PDF report generation with company branding, project details, and automatic calculations.

FEATURES BUILT-IN TESTS FOR:

AASHTO T 27, AASHTO T 30, AASHTO T 166, AASHTO T 209, AASHTO T 255 AASHTO T 269, AASHTO T 308, AASHTO T 329, AASHTO T 331, ASTM D2041, ASTM D2726, ASTM D6752

Emma is compatible with the most popular lab scales, including A&D, Ohaus (shown here), Cole-Palmer and Adam/Luna digital scales. (Scales not included.)
